# Documentation

FEEDBACK WALL

Supports Android/iOS/Windows/Mac

It is a tool to give feedback continuously in workshops, events, or meetings in four categories: things that make attendees happy, things they feel neutral about and things they didn't like. Usually, it is either an empty flipchart or a collection of post-its.

Copy **Questions.txt** and **UserData.json** from [Files] to StreamingAssets.
Chage questions and 4 options according to your requirements.

1. Open Project
2. Build and Run
3. Demo Build - PC :
